2003 - Registered Nurse

2023 - Safeguarding Level 4

EXPERIENCE

Hannah is based on the South Coast and qualified as a Registered Nurse in 2003. As well as a case manager she is also the Clinical Lead and CQC (Care Quality Commission) Registered Manager for AJ Case Management. Prior to joining AJ Case Management, Hannah worked as a Clinical lead for a large complex care company and as a Nurse caring for clients with complex needs in the community. She has a wealth of experience supporting clients with spinal cord injury, acquired and traumatic brain injury, motor neurone disease, muscular dystrophy, and cerebral palsy.

Hannah is an experienced hospital and community nurse. Within the hospital she worked in Critical care where she became a unit sister. Alongside Hannah's NHS career she has worked in the community for 16 years. This has provided her with the invaluable experience of working with patients who have complex long-term care needs and medical requirements that need careful coordination and management. These roles routinely involved working closely with families to ensure the patient needs were comprehensively addressed and a patient centred outcome was achieved.

As a clinical lead Hannah managed a large complex case load which has enabled her to gain specialist knowledge in the care and management of clients with complex needs. Hannah's clients had high level needs including Ventilation via Tracheostomy, Cough Assist, suctioning, Gastrostomy and Catheter care. Her role included managing complex MDT's and large teams of support staff, liaising with acute and community NHS staff, devising, and implementing training, protocols, and person-centred care plans, managing teams of trained nurses and health care support workers to help clients identify and achieve their goals. She has a passion for creating a good teamwork approach within all care teams and MDT's and promoting open and honest communication. She enjoys creating strong professional relationships with her clients gaining their trust and putting the clients at the centre of their care.

Hannah spends her free time with her two children, husband and two sausage dogs. She lives by the sea and takes every opportunity to jump on her paddle board

TESTIMONIALS

Having Hannah Akca working as our case manager has changed my life. Nothing is too much. She's kind and understanding of everything.
