## EXPERIENCE

Kerry provides case management for adults in the midlands, east anglia and south east.

Kerry qualified as a physiotherapist in 1999. She initially worked in a general hospital gaining experience in all aspects of physiotherapy care including neurology, respiratory orthopaedics, elderly care and musculoskeletal outpatients. She then went onto specialise in musculoskeletal care and has worked for the NHS in large acute hospitals and community settings as well as different sectors within private practice.

For the last 17 years Kerry has worked as an advanced physiotherapy practitioner. This has involved gaining skills and qualifications in requesting and interpreting radiological investigations such as x-rays and MRI scans, prescribing medication and providing joint and soft tissue steroid injections to complement her Musculoskeletal physiotherapy skills. Kerry has also worked in pain management rehabilitation for clients with persistent pain.

Kerry case manages adult and young adult clients with complex conditions including:

- Complex orthopaedic injury
- Spinal cord injury
- Limb loss
- Traumatic brain injury
- Chronic pain conditions
- Complex regional pain syndrome
- Peripheral nerve injuries
- Cauda equina syndrome

Kerry is experienced in managing the multi-disciplinary team involved in the rehabilitation process. She is also experienced in the recruitment, management, education and development of support staff.
